

Paediatric 'Passport'

Please insert this sheet into the baby's Personal child health record (Red Book)

CONI is a programme that provides support for families who have experienced or are at higher risk of **sudden infant death (SIDS)** or sudden and unexpected baby death, and who are expecting/have given birth to a new baby.

Baby's Name.....

CONI Coordinator.....

Telephone.....

CONI Paediatrician.....

Health Visitor.....Telephone.....

If this child is brought to a **general A & E**, please ensure the child is assessed by a **senior doctor trained in paediatrics or senior paediatric nurse**.

See overleaf for further information

CONI support includes:

- Movement (breathing) monitor
- Symptom diary
- Baby Check App– symptom assessment tool
- Sheffield weight chart –to assess weight gain in babies

Parents may be alerted to request help due to changes in their baby identified by the above.

The **family health visitor** offers extra visits and is the key worker with the family.

In many areas the baby is offered open access to a senior **paediatrician**, to the children's ward or clinic as per local arrangements.

For more information about CONI contact the **local CONI Coordinator** named overleaf.
